

D.T.U.

"Detachable Towing Unit"

The new Holmes D.T.U. (Detachable Towing Unit) offers proven design and technology from the oldest and most trusted name in the towing industry. The front legs allow the unit to be easily removed in a matter of minutes so your truck can be multi-functional for both towing or pulling trailers.

The D.T.U. is designed to secure to your truck using a front lock-down bracket and your Fifth Wheel Plate. The power for the unit is provided by an optional wet line kit, with quick connect couplers, which is installed on your truck. Other popular options include a 20,000- or 25,000-pound planetary winch, tool boxes and lanyard controls; all of which are available from your local Holmes distributor.

DETACHABLE TOWING UNIT
